SWEDISH-MADE GLASS BALUSTRADES

All our glass balustrades are developed and produced in our own facilities in Sweden. ClickitUp® by ErgoSafe is an innovative glass balustrade system designed by us, focusing on innovation and functionality. We have developed a system that can be adapted to all types of outdoor environments and works perfectly for both ground-floor and balcony installations.

FROM IDEA TO INSTALLATION

We are experts in glass balustrades for exposed environments and follow your project all the way, from the idea stage to completed installation. Our product experts help you choose the right glass balustrade for your patio. We have extensive knowledge in glass and aluminum, and we always do our best to assist and guide you to a patio where memories are made.

QUALITY AND SAFETY YOU CAN TRUST

Quality is our foremost guiding principle. Our glass balustrades are manufactured by our specially trained staff using recyclable materials and environmentally friendly decisions at every stage. We only choose components of the highest quality, and our glass balustrades are safety-rated for your peace of mind. That ClickitUp® by ErgoSafe is sustainable and safe is our promise to you. With rigorous testing and high-quality materials, we guarantee glass balustrades that are both robust and elegant.

ErgoSafe's ClickitUp® branded glass balustrades are design-protected by: design right 002416248.001-005. 3/3 2014.
Our design protection means that no other operator has the legal right to manufacture, sell or import copies of ErgoSafe's glass balustrades within the EU.

OUR GLASS BALUSTRADES

By choosing a glass balustrade from ClickitUp® by ErgoSafe for your home patio, you invest in style, comfort, and security. The height-adjustable ClickitUp® is the original and the foundation for our various glass balustrade models, all with the same design and durable construction.

With our height-adjustable glass balustrades, you can create a wind-free zone in your outdoor space. The seamless design with unobstructed glass edges offers uninterrupted views without details that distract. In your own tranquil atmosphere, you can enjoy your outdoor space, even on days when the wind blows cold.

With quality as our guiding principle, a reliable and safe construction, and a wide range of glass balustrades, we help you create a patio tailored to your needs.

Glass balustrades for ground floor

ClickitUp, CiUFixed, CiUFlex

When the patio is at ground level

- Our glass balustrades for ground level
- + Possible to combine with each other
- + Also available as door & curved corner
- + With or without wind protection
- + Designed for safety & durability

Function and aesthetics in perfect harmony for the patio

Our glass balustrades for ground level create a functional and aesthetic outdoor space. What characterizes our constructions for ground level is that the balustrade must not be installed where there is a risk of falling. Choose between ClickitUp, CiUFixed, and CiUFlex depending on your needs.

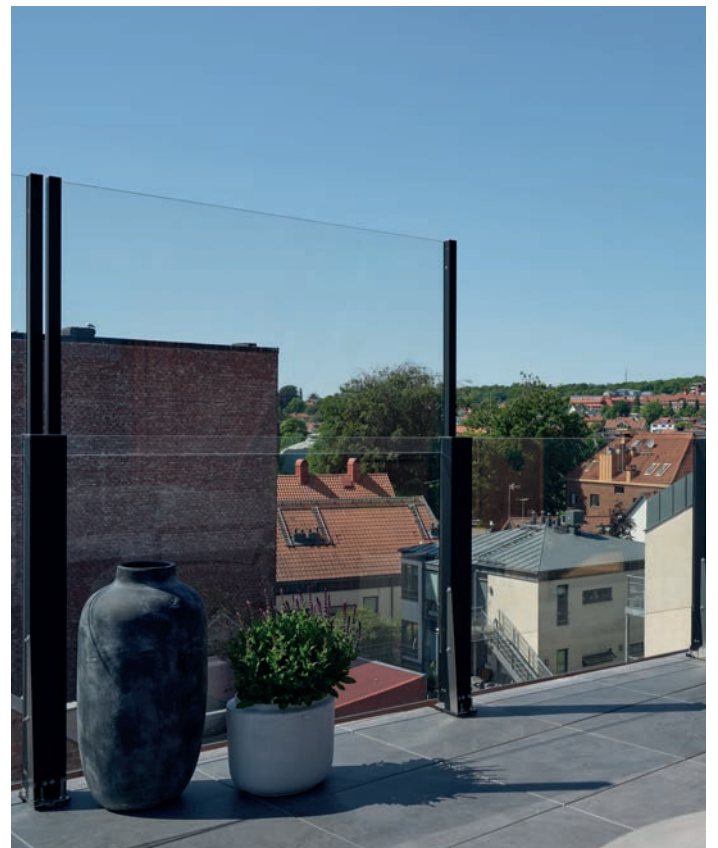

ClickitUp is the original height-adjustable glass balustrade with free glass edges. CiUFixed has the same sleek and elegant design as ClickitUp but consists only of the lower fixed glass. The variants are compatible and can easily be combined, just like all our glass balustrade variants. CiUFlex can be upgraded to ClickitUp, and it is possible to order the fixed and movable parts at different times.

Glass balustrade for balcony

ClickitUpBalcony, CiUFixedBalcony, CiUFlexBalcony

When the patio is located where there is a risk of falling

- Our glass balustrades for balconies
- + Meet the toughest market requirements
- + Adapted for exposed environments
- + Weather-resistant and durable
- + Ensure style and safety

Glass balustrades that combine style & safety

Our glass balustrades for balconies offer both style and safety. What characterizes installations for balconies is that these balustrades are the ones allowed to be installed where there is a risk of falling. Choose between ClickitUpBalcony, CiUFixedBalcony, and CiUFlexBalcony.

Our balcony models correspond to the ground-level variants but are adapted to the circumstances and requirements of balconies, meeting the criteria for safe balcony installations. Choose between height-adjustable, fixed, or upgradeable glass balustrades, or combine them based on the unique needs of your outdoor space.

Glass balustrade inside an existing balustrade

ClickitUpInside 600, ClickitUpInside 1100

When retrofitting wind protection

ClickitUpInside is a glass balustrade that enables the retrofitting of a height-adjustable wind protection system inside an existing balcony railing.

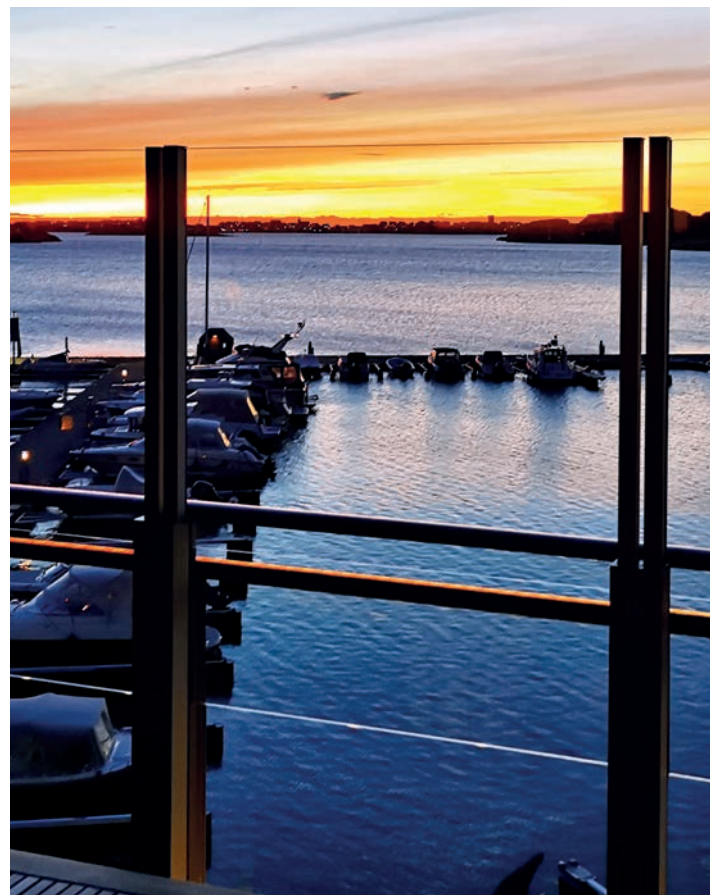

It is available in two different variants, 600 and 1100, where the height of the fixed lower glass distinguishes them. Which variant suits depends on the existing railing.

ClickitUpInside 600 is custom-made and installed in line with the front railing, with a maximum width of 1500 mm. Installation always takes place in the lowered position.

ClickitUpInside 1100 creates a wind-free oasis with crystal-clear views and has a maximum width of 2000 mm.

Glass balustrades for installation inside a railing

- + Retrofitted wind protection
- + Height-adjustable wind protection in glass
- + Two different variants
- + Compatible with other railings

WITH CLICKITUP[®] BY ERGOSAFE, YOU GET...

GREAT VIEWS AND A LONG OUTDOOR SEASON

ErgoSafe's railing systems combine design, quality, safety, and functionality. The design of the glass balustrade is based on durable materials such as aluminum and glass, providing a timeless design and robust construction. Our glass balustrades are climate-resistant and weatherproof. They are rigorously tested to ensure the highest quality and safety. We offer several variants of glass balustrades adapted for both ground-level and balcony installations.

QUALITY, FUNCTIONALITY, AND SAFETY IN ONE

With multiple variants – from height-adjustable to fixed options – we offer flexible solutions suitable for all types of outdoor environments. Whether you prefer to let in a light breeze or block out the wind, our glass balustrades provide the functionality to be flexible. Customize your home's outdoor space according to your needs with our innovative glass balustrade. The sleek design and durable materials ensure the balustrade blends seamlessly into your environment and maintains its appearance year after year. Let your home become a place for relaxation and socializing – all outdoor season long!

DURABILITY IN TIME AND SPACE

Our products are designed to withstand exposed outdoor environments – from windy balconies by the coast to sunny rooftop terraces in the city. The robust construction provides a safe and functional solution that can handle strong winds. Using wind load calculations, we can recommend a safe and durable product for every unique project.

Our glass balustrades frame the finest memories

TECHNICAL INFORMATION

Our glass balustrade systems consist of several variants, developed to meet different installation requirements. We produce glass balustrades in both standard and custom dimensions.

All our glass balustrades can be combined and adapted to the unique needs of your outdoor space. Below is a detailed overview with technical information.

With our extensive knowledge and experience in glass and aluminum, we help you find the best solution for your outdoor space and guide you through the entire process – from design to final installation.
