SWEDISH-MADE GLASS BALUSTRADES

All our glass balustrades are developed and produced in our own facilities in Sweden. ClickitUp® by ErgoSafe is an innovative glass balustrade system designed by us, focusing on innovation and functionality. We have developed a system that can be adapted to all types of outdoor environments and works perfectly for both ground-floor and balcony installations.

FROM IDEA TO INSTALLATION

We are experts in glass balustrades for exposed environments and follow your project all the way, from the idea stage to completed installation. Our product experts help you choose the right glass balustrade for your patio. We have extensive knowledge in glass and aluminum, and we always do our best to assist and guide you to a patio where memories are made.

QUALITY AND SAFETY YOU CAN TRUST

Quality is our foremost guiding principle. Our glass balustrades are manufactured by our specially trained staff using recyclable materials and environmentally friendly decisions at every stage. We only choose components of the highest quality, and our glass balustrades are safety-rated for your peace of mind. That ClickitUp® by ErgoSafe is sustainable and safe is our promise to you. With rigorous testing and high-quality materials, we guarantee glass balustrades that are both robust and elegant.

Designed and manufactured in Sweden. ErgoSafe's glass balustrade marketed under the ClickitUp® brand is design protected through: EU 002416248-0001-0005 (March 2014), GB 90024162480001-0005, EU 015096653-0001-0002, GB, NO DM/2513503. The design protection means that no other party within the EU, the United Kingdom or Norway has the legal right to manufacture, sell or import copies of ErgoSafe's glass balustrades.

SWEDISH-MADE GLASS SOLUTIONS

By choosing ClickitUp by ErgoSafe for your home patio, you invest in style, comfort and safety. The height-adjustable glass balustrade ClickitUp is the original and the foundation of our products, all sharing the same design and durable construction.

Our height-adjustable models create a wind-sheltered zone in your outdoor space. The design with free glass edges provides unobstructed views without disturbing details. The patio gains a calm atmosphere that invites relaxation, even on chilly, windy days. We also offer glass balustrades with different functions and heights.

With quality as our guiding principle, a reliable construction, and a wide product range, we help you create a patio tailored to your needs.

Height-adjustable glass balustrades ClickitUp, ClickitUpBalcony, ClickitUpInside

ClickitUp is the original height-adjustable glass balustrade with free glass edges. ClickitUpBalcony is designed for installations where safety and design go hand in hand. ClickitUpInside is developed for installation inside an existing railing and enables retrofit wind protection. Choose the model based on your needs and the location of your patio.

- + Adjustable wind protection
- + Safe and durable construction
- + Extends the season

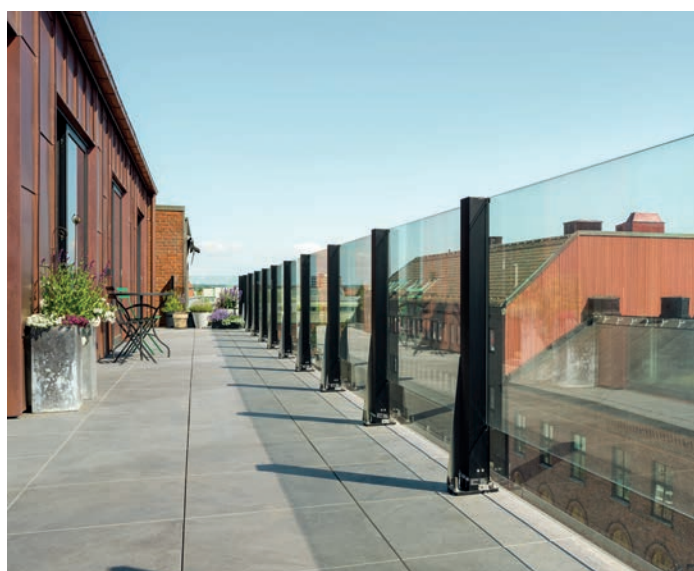

Our height-adjustable models provide effective wind protection and create a sheltered outdoor space, extending the outdoor season. The wind protection can easily be raised without affecting the view. The construction is made from durable materials with a focus on safety and stability for long-term, reliable use.

Glass balustrades CiUFixed, CiUFixedBalcony

Our Fixed models are stylish glass balustrades in standard height that create a safe and elegant frame for the patio. They meet safety installation requirements, are easy to install, and can be combined with our height-adjustable models. Choose between CiUFixed and CiUFixedBalcony.

- + Easy installation
- + Smart and cost-effective
- + Compatible with adjustable glass balustrade

Windscreen

CiUWindscreen

- + Creates a calm outdoor space
- + Delivered in ready sections
- + Clean design

CiUWindscreen is a tall, fixed glass balustrade that functions as a windscreen. It creates a sheltered and more usable outdoor area while preserving the view. The result is increased comfort and protection, allowing the patio to be used more often and for a longer part of the outdoor season.

Glass panels with height-adjustable function ClickitUpPlus

- + Year-round weather protection
- + Raise or lower as needed
- + Weather-protected patio

ClickitUpPlus is a glass section with fixed upper and lower panels and a height-adjustable glass panel in the middle. With a simple hand movement, the glass can be opened or closed to create shelter, protection and comfort. The solution offers flexible glazing with year-round comfort and can be combined with a pergola or other roof installations.

Upgradeable glass balustrades CiUFlex, CiUFlexBalcony

Our upgradeable glass balustrades are based on an innovative and flexible construction that allows starting with a fixed glass balustrade with a flex function and later upgrading it with a height-adjustable windscreen. A smart starting point with the option to upgrade the glass balustrade and the outdoor environment over time.

- + Retrofit wind protection
- + Compatible with ClickitUp
- + Cost-effective solution

WITH CLICKITUP® BY ERGOSAFE, YOU GET...

GREAT VIEWS AND A LONG OUTDOOR SEASON

ErgoSafe's railing systems combine design, quality, safety and functionality. The design of the glass balustrade is based on durable materials such as aluminum and glass, providing a timeless design and robust construction. Our glass balustrades are climate-resistant and weatherproof. They are rigorously tested to ensure the highest quality and safety. We offer several variants of glass balustrades adapted for both ground-level and balcony installations.

QUALITY, FUNCTIONALITY AND SAFETY IN ONE

With multiple variants – from height-adjustable to fixed options – we offer flexible solutions suitable for all types of outdoor environments. Whether you prefer to let in a light breeze or block out the wind, our glass balustrades provide the functionality to be flexible. Customize your home's outdoor space according to your needs with our innovative glass balustrade. The sleek design and durable materials ensure the balustrade blends seamlessly into your environment and maintains its appearance year after year. Let your home become a place for relaxation and socializing – all outdoor season long!

DURABILITY IN TIME AND SPACE

Our products are designed to withstand exposed outdoor environments – from windy balconies by the coast to sunny rooftop terraces in the city. The robust construction provides a safe and functional solution that can handle strong winds. Using wind load calculations, we can recommend a safe and durable product for every unique project.

We manufacture glass balustrades in both standard and custom dimensions for patios, terraces, balconies, and rooftop terraces in residential environments. All our glass balustrades can be combined and adapted to suit the unique conditions of your home. Below you will find an overview of our different models.

With our long experience in glass and aluminium, we help you find the best solution for your home. We guide you safely through the entire process, from idea and design to completed installation.

Feel free to contact us for personal advice and support!

Glass balustrades

Our Fixed models are sleek glass balustrades in standard height that meet the requirements for safe installation. The fixed glass balustrades are easy to install and can be combined with our height-adjustable models.

Windscreen

A sleek windscreen that provides effective wind protection without compromising the view. The sections can be combined with our other models in the ClickitUp series.

Adjustable glass panel system

Together with a fixed roof, such as a pergola, and a pivot door, a stable and flexible glazing solution is created with complete weather protection all year round. The middle section is easily raised and lowered as needed.

Upgradeable glass balustrades

Our innovative design gives you full flexibility. Start with a fixed glass balustrade and add a height-adjustable section later. A cost-effective initial investment that can easily be upgraded.

Freestanding glass balustrades

Free Standing requires no ground anchoring. Combine a planter box or bench with any ground-level glass balustrade from our ClickitUp® system for a flexible solution that creates a functional and stylish outdoor environment.
